Lately, many children are taken from the families because of a false accusation made by the social service workers (Child Protective Services CPS). It gets worse every year. This can happen with any family. Children can be taken from any normal family and parents can be deprived of parental rights.

Social service workers make their money on it. In order to stop this crime, we create a petition to make changes in the law. Based on those corrections, children will be protected from the crime conducted by some social service workers. With those corrections, children will be under the protection of their parents and the law. You can make your own contribution to help kids and parents, taking part in the discussion of making the petition and its advertising.
